A FRAME SLIM TAXI TOP LIGHT

CDL-100/120

Description:

Slim taxi top light is a new product designed by BLF INDUSTRIES. It used for taxi top ads instead of old light box used in common.

Advantages:

SLIM AND LIGHT

The streamlined body can reduce the wind resistance and make sure the safety of the product. The light body can reduce the press of the taxi roof.

LED LIGHT

144 LEDs can make the ads more attractive in the dark environment. LED light is bright and have a long working life.

EASY TO INSTALL AND NO DAMAGE TO CAR.

There are strong magnets on the bottom of the stand of this product, so the only thing you need to do to install the product is to "put" it on the top of the car. (CDL100/120M) We adopt 4 NdFeB Magnets which can make sure the safety of this product under high speed situation.

SAVE COST

The pictures can easily be changed by yourself in one minute. Your time any money can be saved.
